

1 Colour spaces

Each box is filled in a different colour space. The label under each box names it.

			
DeviceGray (g)	DeviceRGB (rg)	DeviceCMYK (k)	CalGray
			
CalRGB	Lab	ICCBased, sRGB profile	Indexed, entry 1
			
Separation (a spot ink)	DeviceN (two inks)	CMYK; RGB in the dark build	Initial colour (cs alone)

Stroke colours

				
Gray (G)	RGB (RG)	CMYK (K)	Lab (SC)	DeviceN (SCN)

Text render modes

Fill	Stroke	Both	Clip
Fill (0 Tr)	Stroke (1 Tr)	Fill and stroke (2 Tr)	Clip with a gradient (7 Tr)

Below is a line of invisible text (3 Tr), the way OCR software lays text over a scan:

2 Gradients and patterns

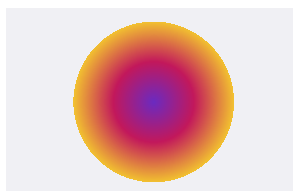

Every kind of shading, the function types that drive them, and tiling patterns.

Function-based (type 1)

Axial, exponential

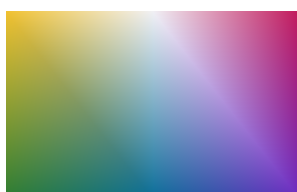

Radial, stitched, Background

Axial, sampled function

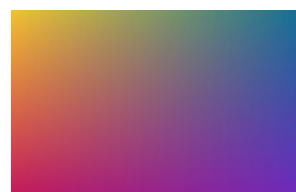

Triangle mesh (type 4)

Lattice mesh (type 5)

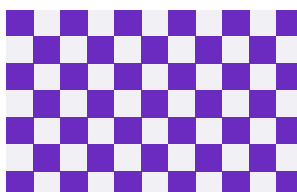

Coons patch + function

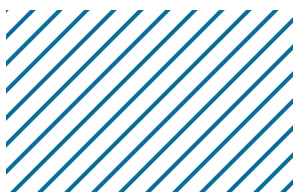

Tensor patch (type 7)

Axial, function array

Coloured tiling pattern

Uncoloured tiling pattern

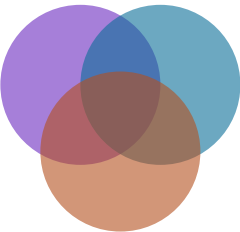

Gradient as a stroke

Gradient text

Text filled with a shading pattern

3 Transparency and forms

Opacity, blend modes, soft masks and groups, then forms that are nested and reused.

Fill opacity (ca)

Blend mode

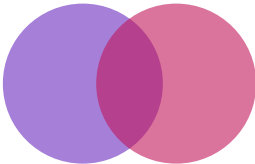

Luminosity soft mask

Alpha soft mask

Stroke opacity (CA)

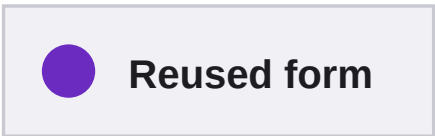

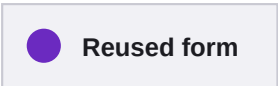

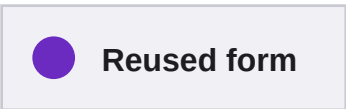

Knockout group

Opacity in dark build only

Forms

One form, drawn three times; it holds a nested form, the dot

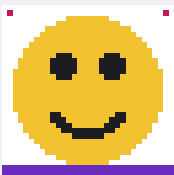

A form with no colour of its own: it takes the colour set before it is drawn

4 Images

Images of every common kind. Some change between the builds and some do not.

Indexed, 8 bits

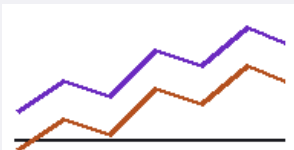

Indexed, 4 bits

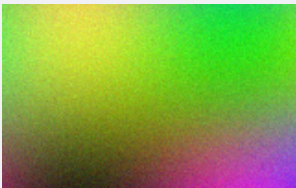

Indexed, 1 bit

Gray; the dark build inverts it

RGB with few colours

Photo, the same in both builds

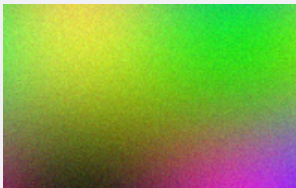

Photo that differs: swapped whole

Soft mask (alpha channel)

Colour-key mask

Stencil mask in the fill colour

Inline image

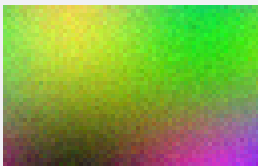

Inline stencil mask

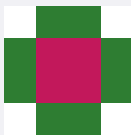

JPEG photo

Inverted by a Decode array

16 bits per component

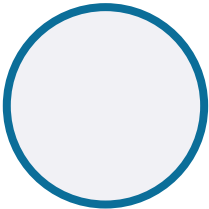

Inline, named Indexed space

5 Annotations and form fields

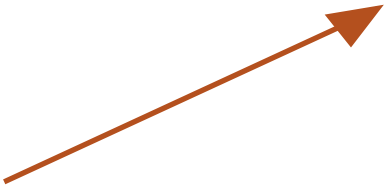

Each annotation has an appearance stream and the colour entries its type defines.

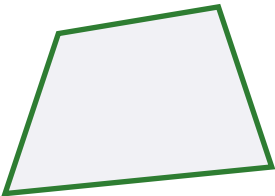

Square: C, IC, CA

Circle: C, IC

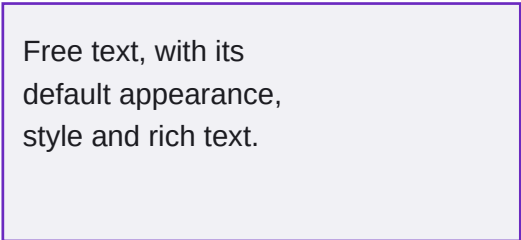

Line: C, IC, arrow

Polygon: C, IC

Ink: C

FreeText: DA, DS, RC, C

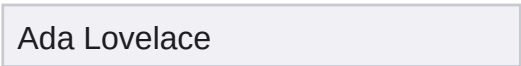

This sentence has a highlight annotation over it.

Highlight: C, and a blend mode in its appearance

Text note with a Popup

[A link \(C, no border\)](#)

Text field: DA, MK BG and BC

Check box: DA, MK, two states

6 Type 3 fonts, layers and structure

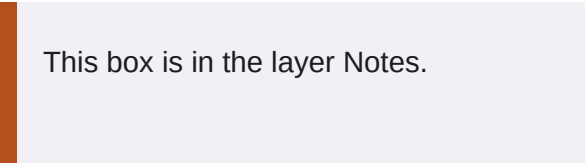

Glyphs that carry their own colours, optional content, and tagged text with layout colours.

Type 3 glyphs with their own colours (d0)

Type 3 glyphs in the text colour (d1)

Marked content in an optional content group

A formXObject in the layer Diagrams

Tagged heading

This paragraph's structure element sets Color, BackgroundColor, BorderColor and TextDecorationColor, and a class map sets more.

Bookmarks carry colours too (C), and page 1 has a thumbnail and BoxColorInfo.
